## IRTS grants a first contract for cockpit displays to LUXELL

TORONTO DEC 21, 2009 - Luxell Technologies Inc. Is pleased to report that it has received a first contract from IRTS for 3 ATI Liquid Crystal Displays for Airplane cockpits.

LUXELL has already developed and produced several 3 ATI displays both in TFEL and LCD technologies for aircraft and customers in North America and Europe. This is the first contract through IRTS with which LUXELL has established a marketing and potential production sharing agreement. IRTS, a France based company, specializes in land and naval display systems, from which Luxell draws increased capability and in return avails IRTS of Luxell's significant aerospace display experience. Under the relationship the two companies are able to market to their customer base and on their territories their respective products and capabilities.

“IRTS is a key player in high-tech naval displays, and our arrangement allows LUXELL to propose the latest most efficient models from their product lines to the Canadian market. The excellent pedigree of IRTS products, with references such as the British, French, Singapore and Italian navies, combined with the expertise of LUXELL in Display design and integration marries the best of our two worlds for designing and producing Canadian products. Likewise, IRTS can benefit from LUXELL in terms of advanced airborne displays for a variety of applications. The model certainly worked for this contract ” declared Gerry HARTLEY, V.P. Business Development at LUXELL.
