

Luxell Uses LCD Glass Resizing Patent Technology to Add Multi-Functions Displays

TORONTO Jan 11, 2010 - Luxell Technologies Luxell has added two multi-function displays (MFD) to its range of landscape and portrait image LCD display products. The units are a 3" x 4" and a 4" x 7" based on re-sized LCD glass panels. They incorporate Luxell's latest techniques for design and patented glass resizing method, working with original size 5" and 8.4" panels to achieve the two different resized displays. In addition, Luxell incorporated proprietary know-how in the backlighting as well as in-house keyboard manufacturing and integration. The Aerospace Display units are also designed to be NVIS compliant.
