

LUXELL receives Order Amendment from INDRA for additional displays for Eurofighter program

TORONTO January 4, 2011 - Luxell Technologies Inc. is pleased to report it has received an amendment to its original purchase order contract from INDRA SISTEMAS S.A.(Spain), for the Maintenance Data Panel it has designed and produced for the Eurofighter program. This production order saw its original start in the 2004-2005 period. Luxell has already delivered and maintained several hundreds of the Maintenance Data Panels (MDP) for the Eurofighter program. The new amendment from INDRA covers the 3rd Tranche, which includes more than 100 of this multi-role aircraft. It also includes reference for additional orders and an amendment to update the provisions for long term support.

The Eurofighter is built by a consortium of three major European companies being Alenia Aeronautica, BAE Systems, and EADS who are working through a German holding company. The Eurofighter has already entered service with the British Royal Air Force, the German Luftwaffe, the Italian Air Force, the Spanish Air Force, the Austrian Air Force and Saudi Arabia has also signed on.

"INDRA is a major player in defense electronics in Europe and that Luxell has been reaffirmed by INDRA as its supplier of the MDP importantly confirms our reputation for delivering high quality products with excellent field performance records. We also see it as an endorsement of the quality and responsiveness of our support on their program", said Jean-Louis Larmor, Luxell's CEO.
